

Flipkart Test Plan

1. Scope

The scope of this test plan is to validate the functionality of Flipkart's major modules such as login, product search, add to cart, and payment gateway. Non-functional aspects like performance and security will not be covered in this cycle.

2. Objectives

The main objective is to ensure that Flipkart's critical user journeys (login, product search, and payment) work as expected without any functional or UI issues.

3. Tools

Test management and reporting will be maintained using Microsoft Excel. Defect tracking will be handled using Jira. Test execution will be manual.

4. Entry Criteria

- All requirements are documented and approved.
- The application build is stable and available for testing.
- Test environment is set up and accessible.

5. Exit Criteria

- At least 95% of test cases are executed.
- All critical and high-severity defects are fixed and verified.
- Test summary report is prepared and approved.
